

FIB beer systems

A better way to serve beer

an **ANDUS** group company

FIB Beer Systems

FIB Beer Systems, located in Leeuwarden-The Netherlands, is specialised in designing, producing, installing and maintaining tank beer installations. We are globally active and have supplied and installed more than 20.000 tanks in bars, restaurants, breweries and on events on every continent for over 40 years. The beer tanks vary in size from 125 litres and upwards and are available in several versions and designs; single wall or insulated; stainless steel or copper, mobile or static. FIB Beer Systems also produces beer delivery trucks (transporting fresh beer from the brewery to the tank beer installation).

History

FIB Industries, established in 1946, developed a beer systems department in the 80s. After 40 years of innovations in beer systems (liners in tanks etc.) it was decided to continue as an independent company named FIB Beer Systems.

Beer tanks

The tank beer installations from FIB Beer Systems are custom made and can be designed, produced and installed according to your specific wishes. The personalised installation can be part of the atmosphere you are trying to create within your company. With our tank beer installations you can have fresh beer, straight from the brewery. FIB Beer Systems: 'A better way to serve beer'.

Logistics

We have several options to transport fresh cold beer from the brewery to your location. From a simple beer tank to a fully equipped beer truck, including the latest technology like solar panels and GPS connections. All can be developed according to your specifications and needs.

Materials and certificates

All parts come from renowned companies and can be acquired globally. This way, fast and good service can be guaranteed. All supplying units from FIB Beer Systems are MID certified.

Certificats:

- ISO 9001
- PED D, H, H1
- ASME U, U2 & R
- EN3834-2
- STEK
- VCK
- SQL
- MID

Design codes:

- EN-13445
- ADME SEC VIII Div. 1, 2
- AD2000
- CODAP
- PD-5500

Installation

A beer installation consists of (minimal) 2 beer tanks with liners inside (bag-in-tank system), a cooling system, a compressor and taps. We can complete an installation within one week. Together with our international partners we supply tank beer systems all over the world.

Once the tanks are filled up, you can tap your cold fresh beer instantly, without additional CO₂. It's the freshest beer possible, straight from the brewery.

Events

FIB Beer Systems has extensive experience with beer equipment for events. For example our stand-alone beer tank. The tanks are isolated and have their own cooling system and compressor. You can start tapping fresh cold beer as soon as your tank is connected. Plug and play!

This solution saves a lot of time and money in comparison to beer kegs.

The advantages:

- No switching kegs
- No pre-cooling kegs
- No beer loss
- Saves space (1x 1.000 litres beer tank = 20 kegs x 50 litres of 50 kegs x 20 litres)
- Lower logistical and operational costs

Liners

Our tank beer doesn't require CO₂. The beer is stored in so-called 'liners'. It is a bag-in-tank system where oxygen cannot reach the product. The compressor presses the beer from the tank to the tap. This saves time, is cost-friendly and environmentally friendly and is the safest system out there today.

Service & maintenance

FIB Beer Systems has a team of installers and technicians. Our maintenance crew is on call 24/7 and can be reached at +31 (0)58 - 294 59 45.

Part of a greater whole

FIB Beer Systems is part of Andus Group, an international operating holding company. The subsidiaries of Andus Group have one aim: Serving the industry. And they have one characteristic in common: to be the best within their own specialisation. On specific projects, group companies work together, combining their experience and resources.

The ambition is clear: the Andus Group companies are always aiming to achieve maximum client satisfaction. This requires high quality, experienced and skilled project management and the use of innovative methods when designing, producing and realising projects. That is why Andus Group can continue to further strengthen their possibilities at the top of the different market segments.

In short: Andus Group is a powerful and reliable partner completely geared to your success.
